MOHAMMED AHMED HAFEZ

FRONT END DEVELOPER

01151312755   mohammedhafez45787@gmail.com   Cairo, Egypt

ABOUT ME

A dedicated Frontend Developer with 3 years of experience crafting responsive web applications . My true passion thrives in crafting captivating , user - centric interfaces . My expertise is finely tuned with the React framework , complemented by adept skills in HTML , CSS , and JavaScript , alongside proficiency in diverse front - end tools . I excel in architecting clean , scalable code optimized for peak performance . Complex challenges are my playground , and I revel in delivering elegant solutions . Eager to embrace new technologies and connect with tech enthusiasts for collaborative ventures .

EXPERIENCE

- Deployed SEO-friendly practices to improve website visibility and search engine rankings.

- Conducted thorough testing and debugging of web applications to drive high-quality and error-free deliverables.

- Integrated APIs with Auth to enhance functionality and data integration within web applications.

- Improved coding of JavaScript and CSS to enhance user experience and functionality.

Projects

ERP - System Elnasayan ●────────────────

ERP - System Elnasyan is the management of all basic operations, including branch and bank data, bank card data, customers, etc., as well as incoming and outgoing inventory, warehouse transfers, purchases, sales, and other operations under development.

My role in project

Front end developer

React.js - tailwind.css - typescript - redux-toolkit

E-commerce Elnasayan ●────────────────

E-commerce Elnasayan is a shopping site that includes logging in, creating a new account, retrieving the password, and also displaying all products with the ability to filter these products using all the latest filtering methods, adding the product to the cart, completing the purchase process, and also commenting on the product and adding a rating. The site also serves the country of Saudi Arabia. In addition to the control panel for this site and other features.

My role in project

Front end developer

React.js - tailwind.css - typescript - redux-toolkit

Elearning Management System(LMS) ●────────────────

The platform allows instructors to create and manage courses by setting the course title, description, uploading course images, and assigning the course to a specific category. Instructors can also set the price, upload course materials, and manage course content, including controlling the visibility of individual chapters (whether to publish, unpublish, or offer them as free previews). The platform integrates with Stripe for secure payments and provides instructors with detailed statistics on total sales and earnings.
For users, the platform offers a search function to find courses by category or keywords. Once a user purchases a course, it becomes available in their personal dashboard for easy access. The entire system is seamlessly integrated with Stripe to handle course purchases securely. **View demo**
